ACHYUTH PV

B.Tech IT Student | Software, Fintech & Web3 Projects

Chennai, India | +91 9363225545 | achyuth.web3@gmail.com

achyuth.tech / GitHub: Achyuth777 / LinkedIn: Achyuth PV

IT undergraduate interested in how software handles inventory, payments and financial risk. Building AI-assisted web projects alongside experience in growth marketing and Web3 community leadership. Seeking software or fintech internship opportunities.

EDUCATION

B.Tech, Information Technology

2024 - 2028 (expected)

SRM Institute of Science and Technology, Ramapuram, Chennai | IT-A

SELECTED PROJECTS

AI-assisted development projects. Links include source code and portfolio case studies.

SupplyLens | Supply-chain planning

Oct 2026 showcase

React, TypeScript, Drizzle ORM, Cloudflare Workers / D1, Zod | Code · Case study

• Connects demand forecasts and inventory runway to purchase orders; uses exponential smoothing and supplier-delay scenarios to support planning.

• Includes revision checks and duplicate-receipt guards for inventory updates. Database-backed MVP with synthetic starting data.

TreasuryFlow | Corporate payment workflows

Oct 2026 showcase

React, TypeScript, Java, Spring Boot, PostgreSQL, Solidity | Code · Demo

• Models payment requests, threshold-based approvals and local EVM settlement, with idempotent requests and event-based reconciliation for interrupted workflows.

• Separates approval, settlement and ledger states. Educational local-chain implementation; the browser demo simulates payments and moves no real funds.

Argus AI | Solana DeFi risk simulator

Oct 2026 showcase

Next.js, React, TypeScript, Tailwind CSS, Solana tooling | Code · Demo

• Explores modeled health factors, liquidation buffers and target repayments under collateral stress; includes simulated protection rules and optional Gemini explanations.

• Uses demo positions with explicit model assumptions. Protection actions are simulated; no live lending indexing or autonomous execution.

EXPERIENCE & LEADERSHIP

Growth Marketing Intern | Kodeus AI

2026

Worked on growth marketing, exploring how people discover a product and understand its value.

Web3 Lead | CodeKrafters, SRM Ramapuram

Appointed Aug 2025

Joined the Web3 leadership team and helped host Launchpad, introducing the club and its domains.

Social Media Manager | The 333 Collective

Mar - May 2025

Managed posting schedules, collaborated on campaign ideas and reviewed performance metrics to refine social media content.

TECHNICAL EXPOSURE & CERTIFICATIONS

Project stack: React, Next.js, TypeScript, Tailwind CSS, Java / Spring Boot, SQL / PostgreSQL, Solidity, Git / GitHub; MongoDB with Python coursework.

Aug 2025 · Solidity Smart Contract Development, Cyfrin Updraft
Jun 2025 · Using MongoDB with Python, MongoDB
